HAIR COLOURING PAPER

More and more hairdressers and hair salons are committed to reducing their carbon footprint in an environmentally and cost efficient way.

A significant percentage of the carbon footprint of hair salons originates from the products and tools needed for day-to-day services like hair colouring.

Hair Colouring Paper is a proven eco-friendly aluminium foil replacement helping you to make a big step forward reducing your total salon's carbon footprint. Remember every step helps combating climate change!

• Position the Rings by placing the open notch at the base of the twist.

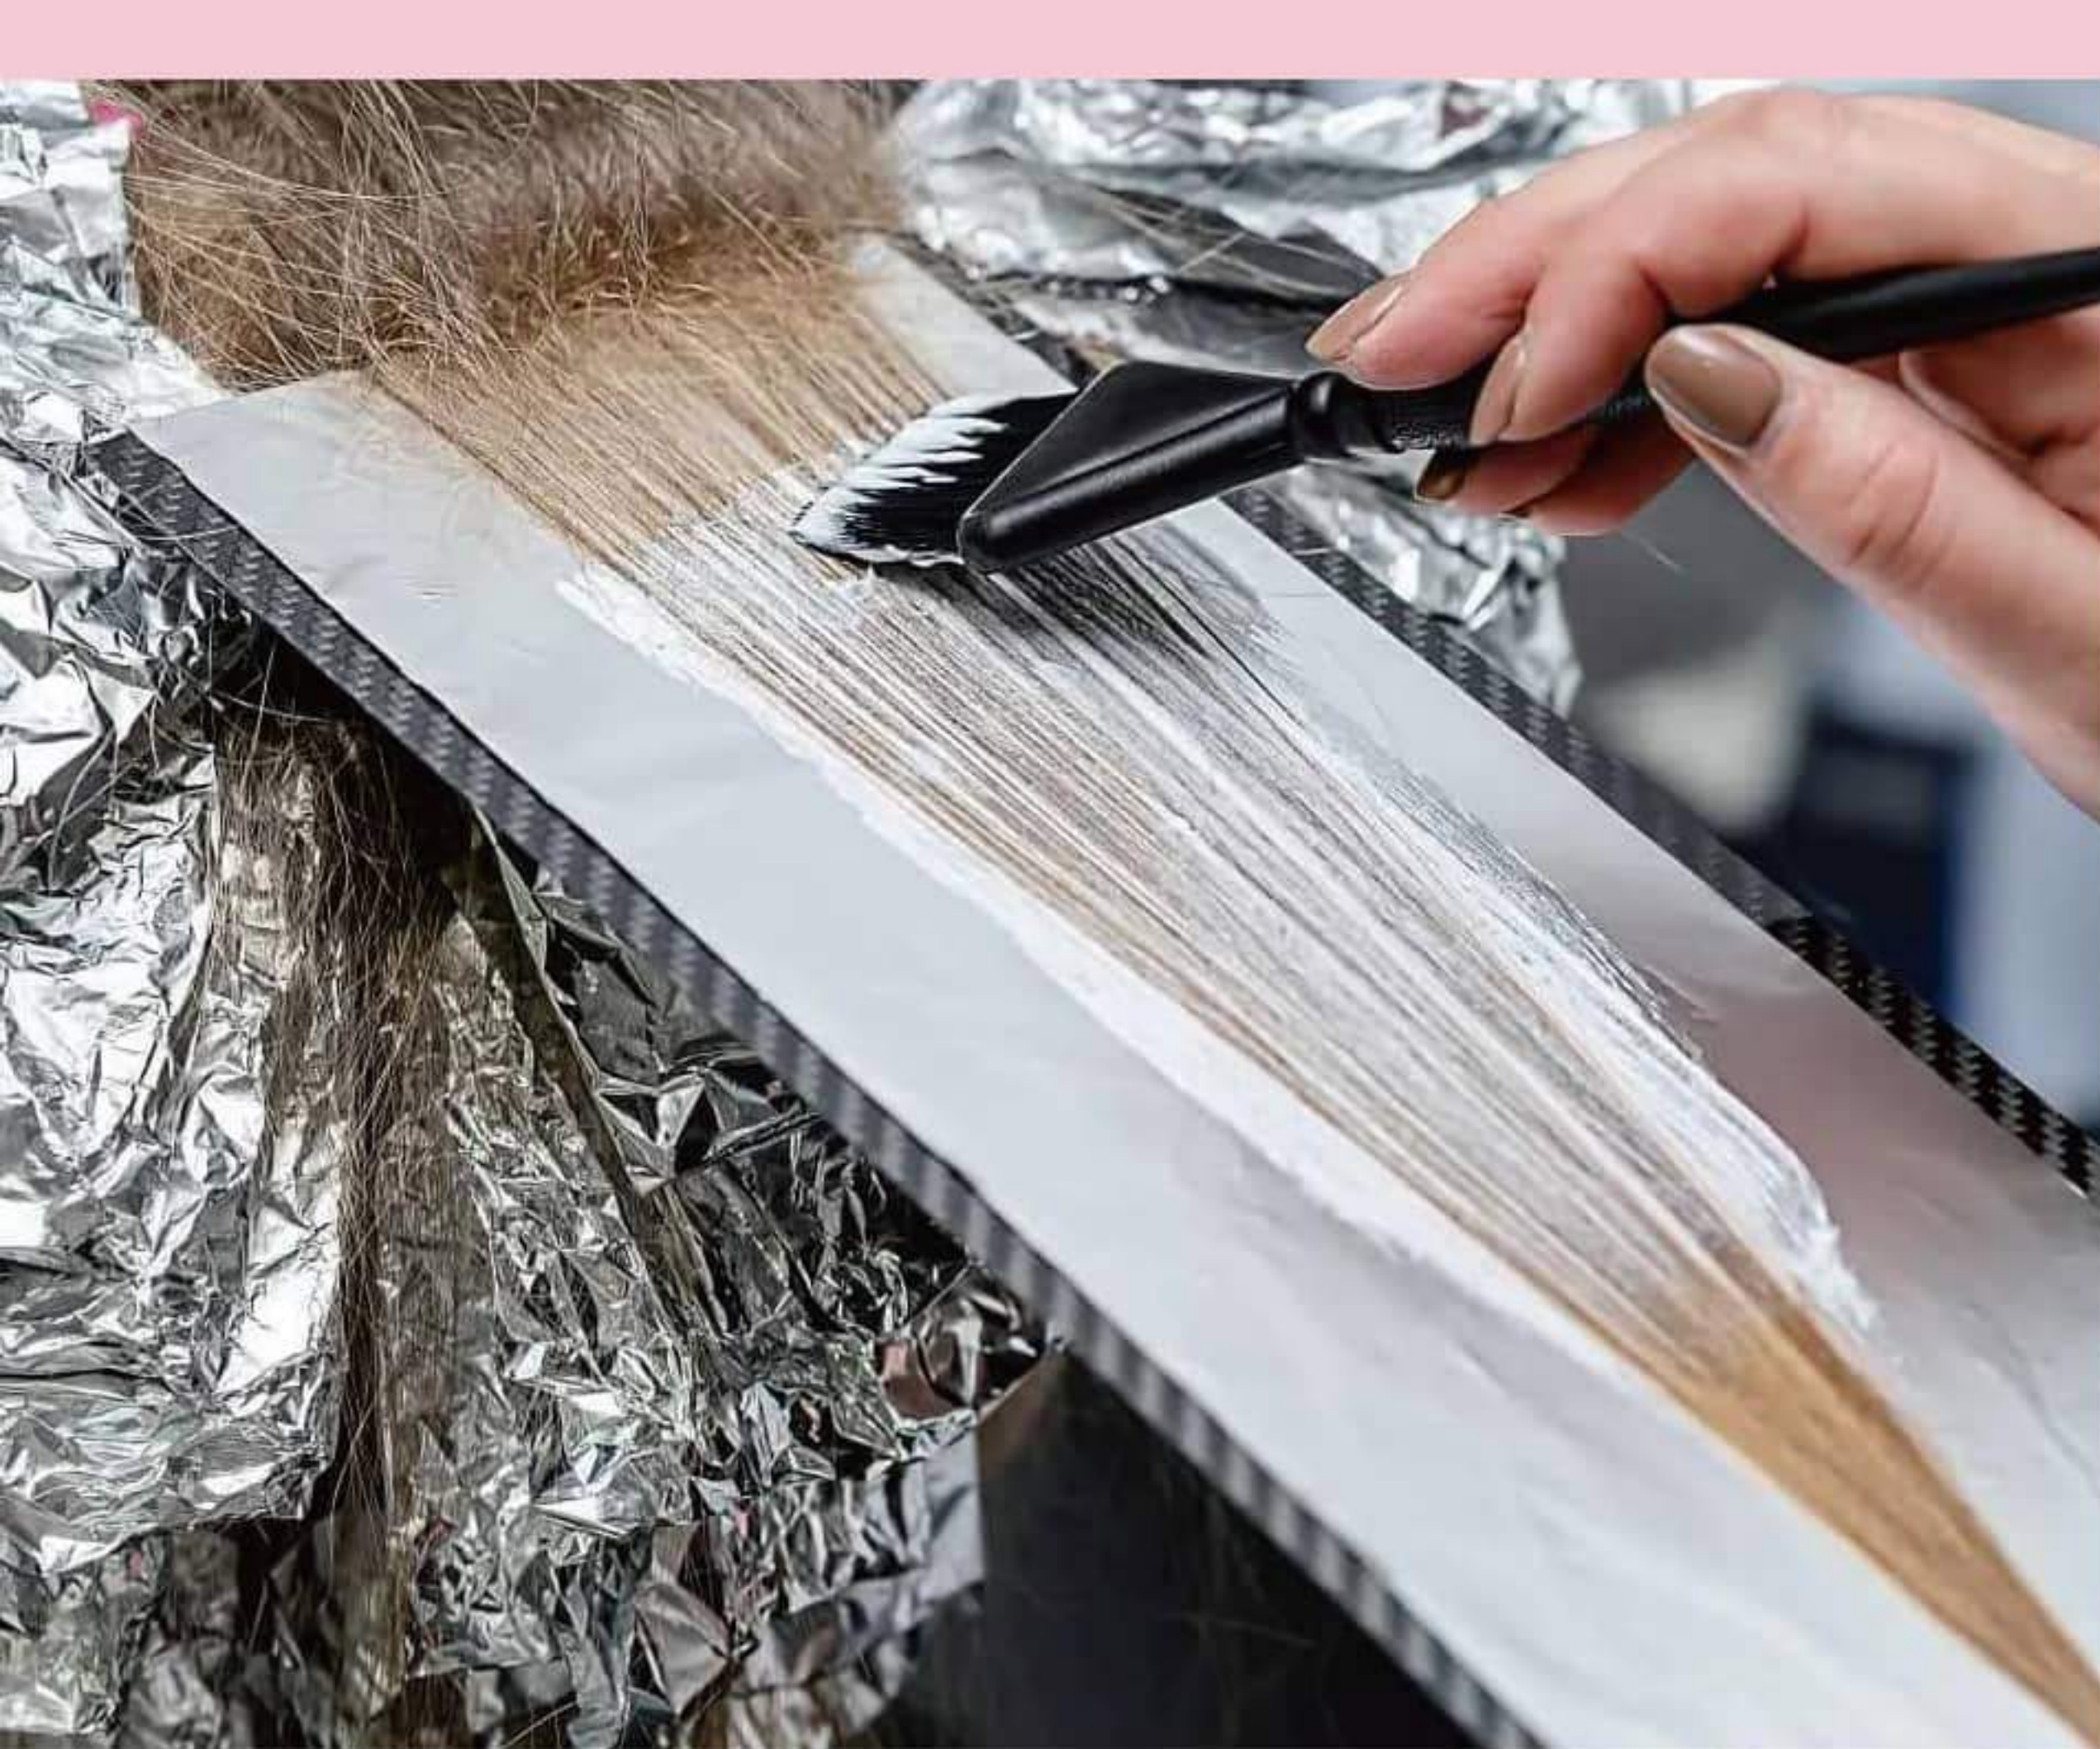

• Direct the twist to curve within the Rings and place the ends smoothly inside.
• The hair should coil into the side of the rings in the direction you twisted.

• Secure the twist with your thumb and insert the Foam Diffuser Ring to hold the hair in place. Close the lid and listen for the "snap" of the case locking.

• Begin at the nape, hold each Ring horizontally in the palm of your hand. Apply first to the base of the twist just outside of the case opening 1/2 - 1 inch.
• The Foam Diffuser Rings will help diffuse liquids evenly and holds the ends in place during processing.
